summary

Day after day, my goal is to be the best full stack developer that I can be, but with emphasis on front end. User experience will always be a priority in my work and styling a website comes naturally. I'm less interested in silly debates about frameworks than I am about actually learning them, and choosing the right one for the job. Plus I'm confident diving into any new stack and dancing with it gracefully. I have an immersive development education, the logic of an engineer, and the flow of an artist at my back. Let's work together!

technologies

Javascript/ES6 | React/React Native | Vue

Redux | HTML5 | SASS | PostCSS

Material-UI | Clarity UI | jQuery | Bootstrap

Jest | Enzyme | SQL | Knex | Mongo DB

Node.js | Express | Koa

Webpack | Babel | Gulp

Python | Elixir | Ruby

PHP | Wordpress/JSON API

Photoshop | Sketch | React Sketch app

Git | Github

experience

Optimal Efficiency
Web Dev | 2017 - Current
Developed a React App from scratch. Worked with strict front end style guides and designs. Converted existing backend into api and integrated redux.

Vital Grill
Junior Dev | 2016
Improved menu and icon styles throughout site. Began working with a designer and bringing designs to life. Improve page speed insights and site performance.

University of Calgary
Junior Mechanical Engineer | 2015
Created engaging student laboratory experiments. Applied thermodynamic/fluid dynamic principles in hands-on experiments

education

Lighthouse Labs
Immersive Web Dev Bootcamp
API's, Databases, Full Stack Development

University of Calgary
Bachelor of Science in Mechanical Engineering
Intro to C++ and Matlab

Online Courses
Web Development Nano Degree (Udacity.com)
Git a Web Developer Job (Brad Schiff,
