summary

Day after day, my goal is to be the best full stack developer that I can be, but with emphasis on front end. User experience will always be a priority in my work and styling a website comes naturally. I'm less interested in silly debates about frameworks than I am about actually learning them, and choosing the right one for the job. Plus I'm confident diving into any new stack and dancing with it gracefully. I have an immersive development education, the logic of an engineer, and the flow of an artist at my back. Let's work together!

projects

Dean Pete
PHP | PostCSS | Gulp | jQuery

A portfolio including a bit more than just sites

github.com/lankypete/dean-pete

Island Fishing Boat Rentals
Sketch | Gulp | ES6 | PostCSS

A modern single page project built from scratch

github.com/lankypete/IFBR
